Weight:	50kgs
Status:	Single
Nationality:	Filipino
Religion:	Roman Catholic
Language:	Waray, Tagalog, English
Father's Name:	Monico S. Espelita Jr.
Occupation:	Security Guard
Mother's Name:	Ma. Cherry Lou P. Espelita
Occupation:	Housewife

Educational Attainment

Self-Learning and Self-Development:

Web and Mobile Applications Development Bootcamp

Qonvex Technology Company
Brgy. Obrero, Calbayog City, Eastern Samar
Learning various technologies for website and mobile app development
(Certificate provided)

Practical/Hands-On Crash Courses Online

1. Google's Data Science Course (ongoing)
2. Web Development Tutorials
3. Currently building practical real world projects in web development
using various tools and technologies such as HTML5, CSS3, Javascript,
PHP, MySQL, JQuery, Bootstrap and Codeigniter 4. (ongoing)

Tertiary Level:

Tan Ting Bing Memorial Colleges Foundation (TMCF)

San Isidro, Northern Samar
1st year Computer Science (transferee)
S.Y: 2021 – Stopped (reason: self improvement, mastering tech
skills and doing web and applications development)

University of Eastern Philippines UEP

University Town Catarman Northern Samar
3rd Year College BSBA-Entrepreneurship
S.Y: 2020-2021

Secondary Level:

Junior High Level:

San Isidro National High School
Brgy. Poblacion Sur, San Isidro Northern Samar
S.Y: 2012-2016

Senior High Level:

San Isidro National High School

Information and Communication Technology (ICT)
San Isidro Northern Samar
S.Y: 2016-2018
Honors Received: 4th Honors

Elementary Level:

Salvacion Elementary School

Brgy. Salvacion San Isidro Northern Samar
S.Y: 2006-2012
Honors Received: With Honors

Skills:

Hard Skills

Web Development
PWA Mobile Development
Front End Web Development
Back End Web Development
Computer Programming
RDBMS
Microsoft Office (Word, Excel, Powerpoint)

Web Development Languages and Markups

HTML5
CSS3
Javascript
Jquery
Bootstrap 4
PHP 7.4.7
MySQL
Codeigniter 4
Brain.js

Soft Skills

Problem Solving
Time Management
Teamwork
Attention to Details
Decision Making

Emotional Intelligence
Focused

I can do various tasks and projects such as:

- *Website Development*
- *Business Website*
- *Personal Blog Sites*
- *Progressive Web Apps Development (for mobile and desktop)*
- *Responsive Websites Development (Mobile first approach)*
- *Website Management and Maintenance*
- *System Analysis*
- *Relational Database Management System*
- *Efficient in Microsoft Office Applications (Word, Excel, Powerpoint)*
- *Chat Applications*
- *Social Media Website development*
- *Website to PWA mobile convertion*
- *Inventory Management web/applications Systems*
- *School Management web/applications Systems*
- *Employee Management web/applications Systems*
- *Organization Management web/applications Systems*
- *Sales Management web/applications Systems*
- *Website Development Tutor*

Work and Experiences:

1. **Qonvex Technology**

   Company: Web and Mobile Apps Development Company

   Location: Brgy. Obrero, Calbayog City, Eastern Samar

   Date: June 24, 2020 (Training/Bootcamp – Front end, Back end and Mobile Dev.)

   Hired: August 1, 2020

   Position: Junior Front End Web Developer

   Stopped: January 2021 (Reason: continue my studies)

   Work experience time: 7 Months (Including training/bootcamp)

2. **Self teaching and exploring different kinds of tools and technologies for self improvement and creating various projects**

3. **Exploring Machine Learning and AI using Python and Javascript.**

I hereby certify that the above mentioned information is true and correct. For more information/details or if you want to see my projects just visit my website: **https://markjason.netlify.app**

My brief history:

I was an Information and Communication Technology (ICT) student during my senior highschool years (2017). Before, computer programming (C++ programming language) was the difficult and most painful subject to me. But as time goes by, I was fascinated in web and become curious about it. My teacher observed that I'm having an interest in web development so he gave me resources (video tutorials) and I studied it with high enthusiasm. As my skill progress in web development, my teacher send me to a web development competition in Bobon, Northern Samar (highschool competition). I was a second placer. After the competition I didn't stop learning it and become more and more interested.

In college, I haven't enrolled the IT because unfortunately it was already closed. I proceed in BSBA Enrep. My web development (self taught) was stopped within 1 and half year. Then in my second year in college I said to one of my professor that I can make him a website for his resort for just P1000 (very cheap) and it was successful.

During pandemic, when face to face classes has over and all students return to their home, I was fascinated more in web development. My interest has been restored. My teacher (the one I mention above) give me an oppurtunity to work on one of the tech company in Calbayog City. I grabbed the oppurtunity and in June 22, 2020, after a few months of training in the company, I was hired. There I've learned a lot. My skills got bigger, I've got more mentors (my co-workers). I've eperience more real world projects.

On January 2021, I resigned because I will continue my study (as my parents said), but I havent gave up on web development. I still make personal projects at home until now and build my own portfolio. I shifted in TMCF in San Isidro as Computer Science student but I've found out that there are unrelated (not applicable) subjects so I quit. I am seeking practical real world projects, so I can learn from them and I also want to add value to the workforce.
